Summary

Backend Java Developer with 3+ years of experience designing and scaling REST APIs, automation frameworks, and internal developer tooling at Zoho. Proficient in **Java, Spring Boot, MySQL, Maven, Docker, and TestNG**. Experienced in CI/CD pipelines, test automation, and AI-assisted development. Strong foundation in OOP, multithreading, and distributed system concepts.

Experience

Zoho Corporation Pvt Ltd

Jan 2023 – Present

Software Engineer | Project Trainee → Full-Time

Tiruchirappalli, Tamil Nadu

- Designed and maintained **100+ REST APIs** using Java Servlets, enabling seamless integrations across internal systems and reducing inter-team dependency resolution time.
- Built and owned the **Product Assets module** serving **500+ internal users**, centralizing inventory of 50,000+ servers and domains to support audit and compliance workflows.
- Engineered an **automation testing framework** using TestNG with MySQL-backed result persistence, enabling data-driven build validation and cutting manual QA effort by **30%**.
- Optimized critical MySQL queries and schema design for test result storage and validation records, improving report generation performance.
- Contributed to a **centralized logging system** by implementing enhancements on the **Apache Kafka** pipeline, improving log routing reliability and message delivery across message delivery across **multiple backend services**.
- Applied **multithreading and concurrent programming** to build high-throughput backend components handling parallel API requests.

Projects

Packlio | Next.js, Supabase, Claude API, Docker, Razorpay | Personal | In Development

- AI-powered SaaS tool that converts product images into marketplace listings for Etsy, Gumroad, and Creative Market sellers via a **multi-agent pipeline** (Claude API, Ideogram v3).
- Implemented **Razorpay payment integration** with four-tier subscription model and automated email workflows via Resend.
- Architected **serverless backend** on Supabase with Row Level Security, multi-tenant auth, and real-time data handling.

Eclipse Project Builder Plugin | Java, Ant, Eclipse API | Internal Tool

- Extended Eclipse's **Incremental Project Builder API** to automate builds on file save, eliminating manual invocations during development.
- Implemented **delta-based build targeting**, reducing build time by **60%** and boosting team productivity by **80%**.

CUD Framework | Java, MySQL, Java Servlets | Internal Tool

- Architected a **configuration-driven CUD framework** over Java Servlets, eliminating **80% of boilerplate code** and cutting development time by **40%**.
- Implemented **automatic table relationship management** and dynamic query generation, adopted team wide to standardize DB operations.

Education

Thiagarajar College of Engineering

Jul 2019 - May 2023

Bachelor of Engineering in Mechatronics (CGPA: 8.86)

Madurai, Tamil Nadu

Publications

Vijayalakshmi, M., Shaambhavi, S., **Murale Manohar, M** (2023). **Mobile Malware Detection: A Comparative Study of Machine Learning Models**. In: Shukla, P.K., Mittal, H., Engelbrecht, A. (eds) *Computer Vision and Robotics*. CVR 2023. Algorithms for Intelligent Systems. Springer, Singapore.

Technical Skills

Languages: Java, SQL, Python
Frameworks: Spring Boot, TestNG
Databases: MySQL
Messaging: Apache Kafka
Build Tools: Apache Maven, Apache Ant
DevOps/Tools: Docker, Git, CI/CD Pipelines
AI Tools: Claude API, GitHub Copilot
IDEs: Eclipse, Visual Studio Code
Concepts: OOP, Multithreading, REST APIs, Data Structures & Algorithms
