Summary

Backend Java Developer with 2+ years of experience building scalable APIs, automation frameworks, and productivity tools. Skilled in **Java, Servlets, TestNG, MySQL, Apache Ant, and Maven**. Experienced in **CI/CD pipelines**, Eclipse plugin development, and custom framework design. Strong foundation in OOPS, multithreading, and software best practices.

Experience

Zoho Corporation Pvt Ltd

Jan 2023 – Present

Software Developer | Project Trainee → Full-Time

Tiruchirappalli, Tamil Nadu

- Developed and maintained over **70+ backend APIs** using Java Servlets, enabling seamless integrations across internal systems.
- Contributed to Product Assets, serving **200+ internal users**, to centralize and display asset inventory including 10,000+ servers and domains, supporting audit and compliance checks.
- Applied core Java concepts including **OOPS principles, multithreading, collections, and exception handling** to build scalable, maintainable, and concurrent backend components.
- Managed **data persistence** using MySQL, designing schemas and queries to store test results, configuration data, and validation records critical for reports and compliance.
- Built an **automation testing framework** on TestNG that captures test results in MySQL database, enabling data-driven build validation and improving release quality.
- Debugged source code to identify and **resolve bugs**, improving application stability and performance.
- Worked with version control systems like **Git**, enabling efficient code collaboration and management.

Professional Projects

Eclipse Project Builder Plugin | Java, Ant, Eclipse API

- Developed a custom Eclipse plugin builder by extending the Incremental Project Builder API, **enabling automated project builds** triggered in file save during development.
- Optimized build efficiency by targeting only modified files, reducing redundant processing and improving development and testing speed.
- **Boosted developer productivity by 80%** by automating builds and reducing manual effort.

CUD Framework | Java, MySQL, Java Servlets

- Designed and implemented a CUD (Create, Update, Delete) framework that **cut down boilerplate servlet code by 80%**, improving developer productivity.
- Enabled all developers to perform CUD operations effortlessly by building a **configuration-driven framework** that **automatically manages table relationships** and executes database operations, reducing development time by 40% and minimizing errors.

Education

Thiagarajar College of Engineering

Jul 2019 - May 2023

Bachelor of Engineering in Mechatronics (CGPA: 8.86)

Madurai, Tamil Nadu

Publications

Vijayalakshmi, M., Shaambhavi, S., **Murale Manohar, M** (2023). **Mobile Malware Detection: A Comparative Study of Machine Learning Models**. In: Shukla, P.K., Mittal, H., Engelbrecht, A. (eds) Computer Vision and Robotics. CVR 2023. Algorithms for Intelligent Systems. Springer, Singapore.

Technical Skills

Languages: Java, SQL, Python
Frameworks: Spring Boot, TestNG
Databases: MySQL
Build Tools: Apache Ant, Apache Maven
IDEs/Tools: Eclipse, Visual Studio Code
Version Control: Git
